

Creativ-Ceutical is a fast growing global consulting company specialised in HEOR with 100 full time employees. The company was founded in 2008 by Professor Mondher Toumi. Our employees are located in 4 continents, throughout European countries, the USA, Japan, China and Tunisia. Our clients include pharmaceutical companies, biotech and medical device firms and government institutions, including the European Commission (EAHC). To support activities in our key office in Krakow, we are looking for a

Junior Modelling Analyst,

Health Economics and Outcomes Research.

What HEOR is?

HEOR is a branch of science which uses clinical and economic evidence to determine the value of drugs, and looks at the factors that can affect this.

HEOR jobs are scientific and technical, using a variety of models to collect and analyse data that will lead to the most cost-effective and equitable use of resources in healthcare.

HEOR is a field with growing importance with lots of opportunities of professional development all over the world and increasingly in Poland.

The opportunity

You will primarily conduct Health Economics and Outcomes Research studies related to health technology assessment submissions, with the opportunity to participate in corresponding publications. The role will focus on **health economic modelling**, but you may also participate in **evidence synthesis** (meta-analysis) and **statistical analysis** of health data.

Within these projects you will be assigned to tasks including

- Assist in the preparation and implementation of health economic models and statistical analyses
- Contribute to literature reviews of clinical trials and perform the (network) meta-analyses
- Produce draft reports, summaries and project deliverables
- Prepare presentations for other team members and clients

Requirements

Must have

- Master degree in statistics/mathematics/econometrics or similar
- Strong analytic capabilities and quantitative skills
- Proficiency in using Microsoft Word, Excel and PowerPoint
- Excellent interpersonal skills and team-oriented mind-set
- Good written and verbal communication skills in English

Nice-to-have

- Familiarity with frequentist and Bayesian statistics, and ability to understand advanced statistical concepts will be an advantage
- Knowledge of VBA or other programming languages will be an asset
- Familiarity with statistical software (SAS and/or R) will be an advantage
